Descriptors-Business Education, College Curriculum, *College Programs, Community Colleges, *Directories, *Educational Guidance, Educational Opportunities, Health Occupations Education, Junior Colleges, Occupational Guidance, *Post Secondary Education, *Technical Education, Technical Institutes
Identifiers-New Jersey, New York

Information obtained from the 2-year colleges of New York and New Jersey is presented in this directory. Career curriculums in 140 areas are offered by the 66 institutions. In the institutional directory, information includes cost, financial aid, and career curriculums offered. In the second section, colleges are classified by the occupational areas of business, health and services, and technologies. A map showing the approximate location of each institution is included in the document. This is a revision of ED 021 980. (DM)

FOREWORD

This pamphlet is a revision of the 1966 edition EDUCATIONAL OPPORTUNITIES FOR THE SECONDARY OCCUPATIONAL PROGRAM GRADUATE and incorporates some major changes in format and material. The focus of the publication is centered on providing high school guidance personnel with a prime source of educational information.

The changes in this pamphlet are sufficiently major to preclude its designation as a second edition. It should be considered a new publication. Major emphasis is now placed on college offerings, costs, and financial aid. A section on approved private vocational schools has been added. It is hoped that the new format and the information contained will be helpful in counseling students in need of occupational and educational guidance.

The information was obtained from the two year colleges of New York and New Jersey. The data have been programmed and encoded and stored on memory tape for instant print-out. The maintenance of a central depository of information will serve the additional purpose of having up-to-date data available at all times: Anyone seeking more information on the stored data should write Dr. Joseph S. Winters, Student Life Department, Borough of Manhattan Community College, 134 West 51 Street, New York, New York 10020.

Mrs. Theresa Mack, Associate in the Bureau of Occupational Education Research, coordinated the publication of this pamphlet. Additional copies may be obtained by writing: Bureau of Occupational Education Research, New York State Education Department, Albany, New York 12224.

Carl E. Wedekind
Director, Division of Research
New York State Education Department

TO THE COUNSELOR

It is the belief of the project director that guidance emphasis should be on clarification of vocational goals and the opportunities for satisfying vocational needs through educational resources.

Effective vocational guidance procedures indicate that informational materials conform to acceptable criteria. Among these criteria, two are certainly vitally important: the accuracy of the information and the dating of the materials. In this publication, every effort has been made to ensure both accuracy and currency.

The publication is divided into two major areas, one containing an alphabetical list of two year colleges in New York and New Jersey, and the other an alphabetical list of career curriculums. The listing of the colleges contains basic information designed for screening purposes. That is, the address, tuition costs, financial aid available, and career curriculums are given for each school. The listings for schools in New York begin on page1 and those in New Jersey on page38.

There is also an alphabetical listing of curriculums and the schools offering them starts on page 47. Note that all curriculums are divided into one of three catagories: Business; Health and Service; Technologies. These divisions may appear arbitrary but, it is hoped, not capriciously so. Some of the career programs do not fit easily into a set category. For example, Medical Records Technology offered by Bourough of Manhattan combines training in secretarial skills and knowledge of medical practices. The job is clerical since its practitioners are responsible for the maintenance of health records and the recording of health information. It is, however, technical to a greater degree because of the amount of knowledge of medical terminology and practices needed for proficiency. Therefore, the curriculum is listed under Health and Service.

There are other programs that do not lend themselves readily to classification. Recreation Leadership, for example, might be considered a social service or health occupation. In order not to have a profusion of headings, a Health and Services grouping was used to cover the health technologies and those curriculums that train for public service. Similarly, the Technology section includes not only mechanical and artistic careers but some gray areas such as Hotel-Motel Management.

In contrast to the previous publication,* the stress in this is on available course offerings rather than on admissions' standards. There are three significant factors which determined this action:

1. Admission requirements will vary intra-school with respect to the various degree programs.

2. Requirements may be waived by many of the colleges when

*Educational Opportunities for the Secondary Occupational Program Graduate, February 1966.

admitting students into special programs such as College Discovery and SEEK, and even in individual cases.

3. The new SUNY and CUNY Master Plans, with their stated objectives of open enrollment and with emphasis on remediation, will affect future policies and admissions patterns.

Another factor might be added to this list, one that was noted in the 1966 publication. The non-academic high school student is often left stranded because he cannot meet a rigid admissions' requirement. In a sense, the community college is not meeting its responsibility when it hampers the mobility of large segments of the high school population. The failure of the student to achieve his highest potential is a national economic waste and, more important, a source of life frustration to the individual.

One last word on a suggestion for effective use of the material. It is vocationally axiomatic that job success and satisfaction will depend to a great extent on the aptitudes and interests of the individual. The educational resources information offered here can serve in counseling as a useful adjunct to the development of career plans. Effective career guidance requires thoughtful counseling, knowledge of the individual, and accurate and timely educational and occupational information.

Acknowledgments

The director wishes to express his appreciation to everyone at the Borough of Manhattan Community College who helped in the preparation of this manuscript. In particular, he is grateful to the faculty and the staff of the Department of Student Life and the Data Processing Department for their unstinting help. It is but proper to acknowledge those who performed so nobly in compiling this material: J. Michael Fried, Research Assistant; Marvin Kushner and Soren Smith of the Data Processing Department; Linda Porcello and Mrs. Conchita Labrada of the secretarial staff. To Leon Cohen, Dean of Students, go special acknowledgments for his counsel and time.

This project was supported by a State allocation of funds for research under Section 4(a) of the Federal Vocational Education Act of 1963.

Design of the title page was suggested by Eleanor Winters.
